

# Configuration

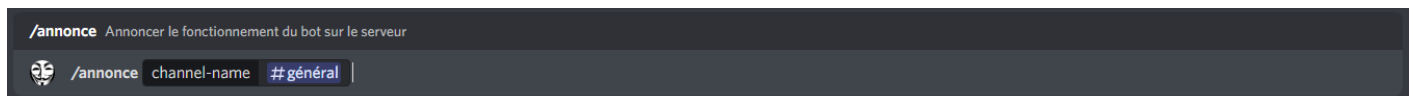

The configuration of the Anonymous bot is done using commands directly on your server in the **#log-anonymous-bot** channel. All the commands presented below must be used in this channel. (If you don't have it, the bot is not installed correctly!)

## Display Help

To display the help, use the command: `/config-anonymous --help`

## Announce the Arrival of the Bot

You can announce to your users the arrival of the Anonymous Bot on your server with the following command: `/annonce`, specifying the channel where the message should be sent. A default presentation message will then appear.

Anonymous RP ✓ BOT Aujourd'hui à 22:32  
@everyone

Hey,  
Comment vas tu ?  
Je vois que tu te poses des questions sur moi 🤔  
Pas de panique, je suis là pour t'aider 😊.

-----  
**F.A.Q. :**

**[Q] À quoi je sers ?**

[R] Je suis là pour ajouté l'option "Anonyme" des messages sur le discord !

**[Q] Suis-je surveillé ?**

[R] Oui, des channels logs sont mis en place pour éviter toutes tentatives de troll de la part de certains utilisateurs malveillants.

**[Q] Où puis-je utiliser ce système ?**

[R] Partout où tu peux écrire dans le channel !

**[Q] Est ce que je peux masquer des images ?**

[R] Oui, il suffit que tu uploads l'image ou bien que tu me fournisses l'URL !

**[Q] Est ce que je peux masquer des fichiers ?**

[R] Malheureusement non, pas pour le moment, mais je fais de mon mieux pour m'améliorer et un jour pouvoir le faire !

-----  
**Voici une liste de commandes qui pourra t'être utile :**

**/mask ton\_message** : Envoie un message anonyme dans un channel

**/crypt clé ton\_message** : Envoie un message anonyme et crypter dans un channel

**/uncrypt clé ton\_message** : Déchiffre un message envoyé anonymement avec la clé de décryptage

**⚠ La clé pour crypter vos messages doit être de deux caractères maximum ! ⚠**

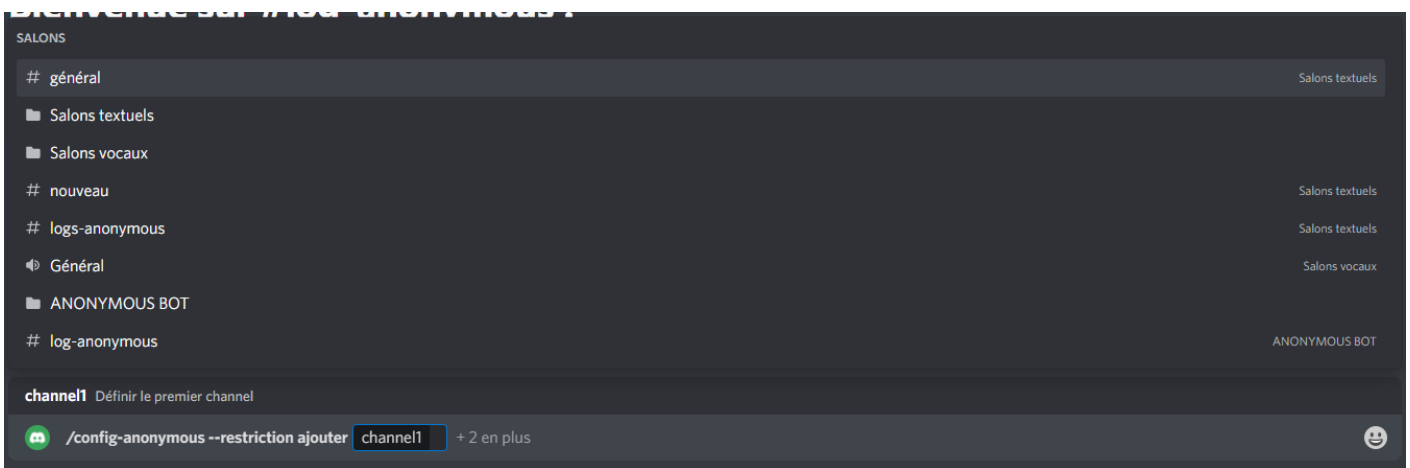

(Exemple : `/crypt ab Ceci est un message crypté`)

(Exemple : `/uncrypt ab Xqkek"xqvtg"rtgokgt"oguucig"fäet{rvë`)

# Limiting the Use of Commands in Channels

## Activate Command Limitation

To activate the limitation of command usage (`/mask`, `/crypt`, `/uncrypt`) in channels, use the command: `/config-anonymous --restriction status activate`

- **Activate the limitation in channels:** `/config-anonymous --restriction status activate:yes`

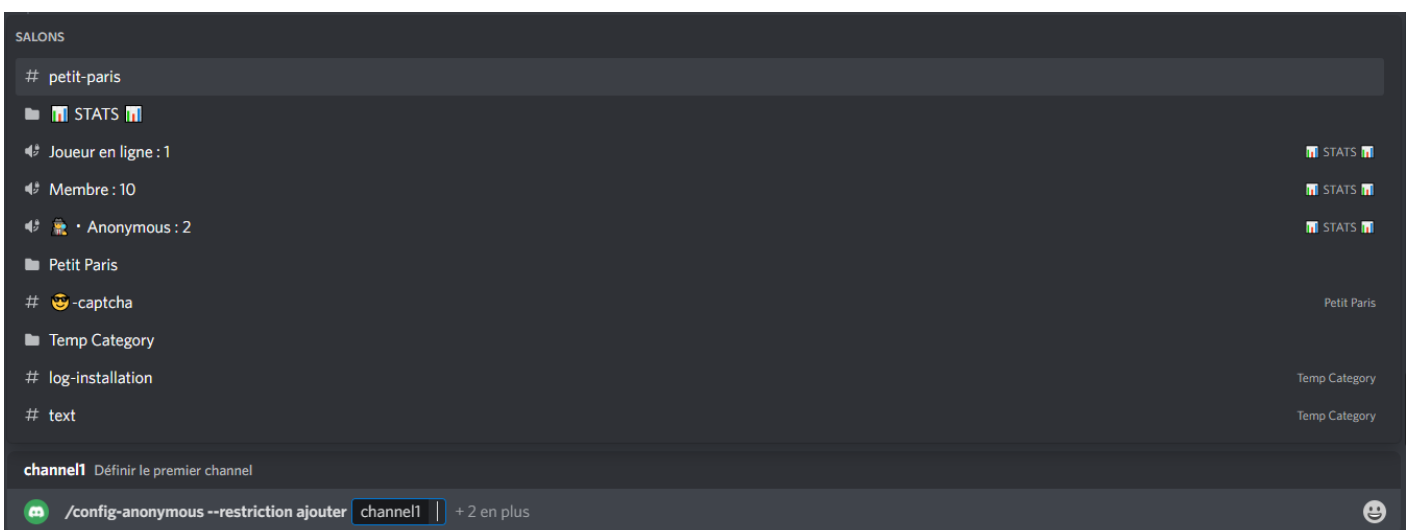

- **Deactivate the limitation in channels:** `/config-anonymous --restriction status activate:no`  
(Allows commands everywhere)

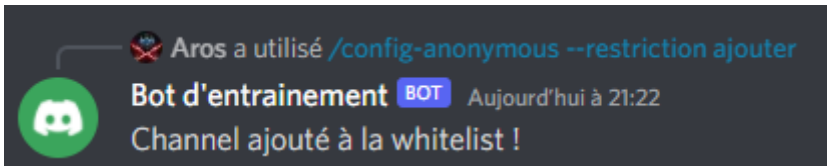

## Define Channels Where Commands Are Allowed

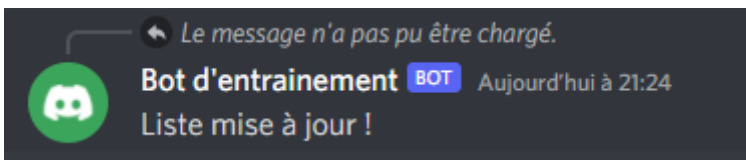

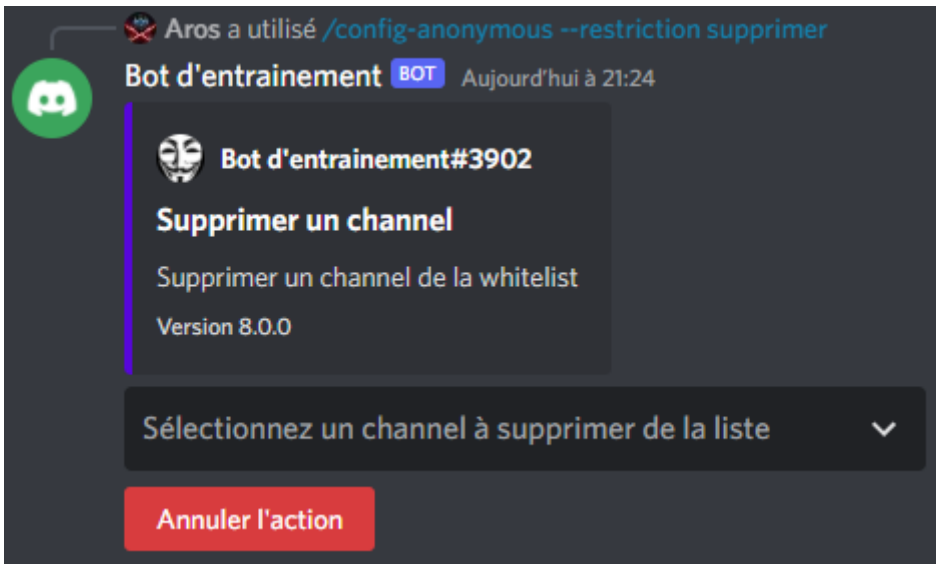

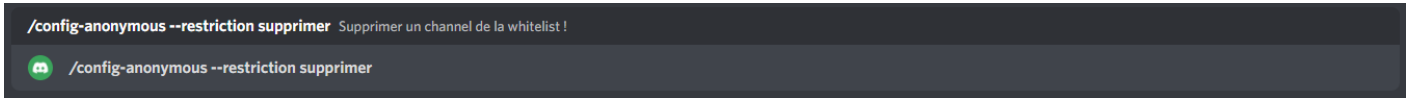

To define the channels where the use of commands (`/mask`, `/crypt`, `/uncrypt`) is allowed, use the command: `/config-anonymous --restriction`

- **Authorize up to 3 channels in a single command:** `/config-anonymous --restriction add`

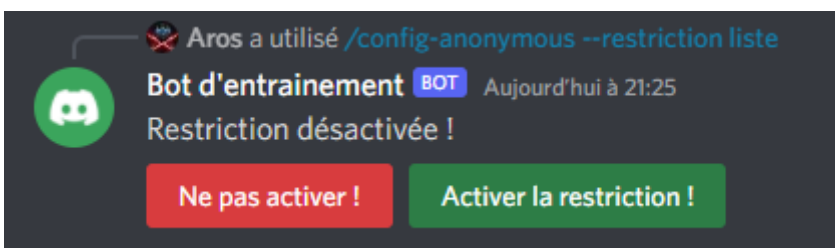

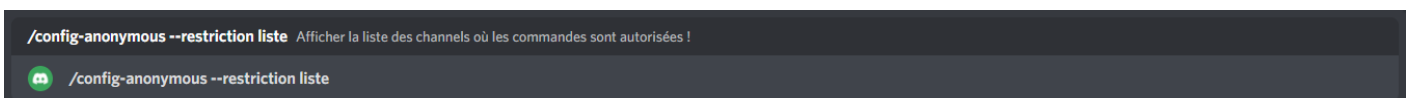

- To remove channels from the list, select the channels to be removed: `/config-anonymous --restriction remove`

## Display the List of Restricted Channels

To display the list of channels where commands are allowed, use the command: `/config-anonymous --restriction list`

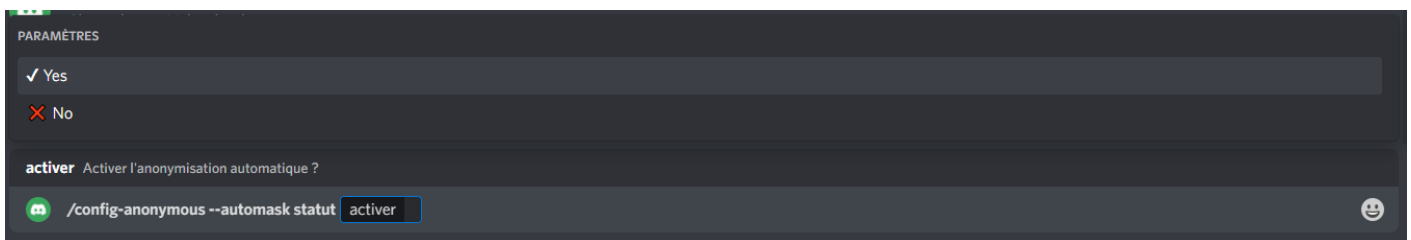

# Automatically Mask a Message in a Channel

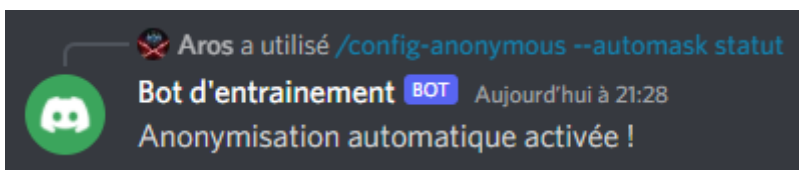

This feature allows messages sent automatically in defined channels to be masked. Automation does not prevent the use of other bot commands in the channel.

## Activate Automation

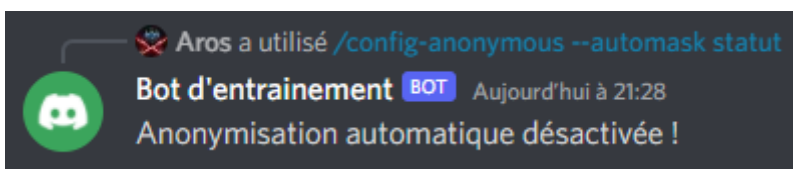

To activate the automation of the mask command, use the command: `/config-anonymous --automask status activate`

- **Activate automation:** `/config-anonymous --automask status activate:yes`

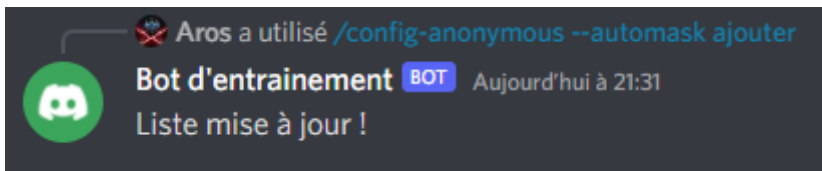

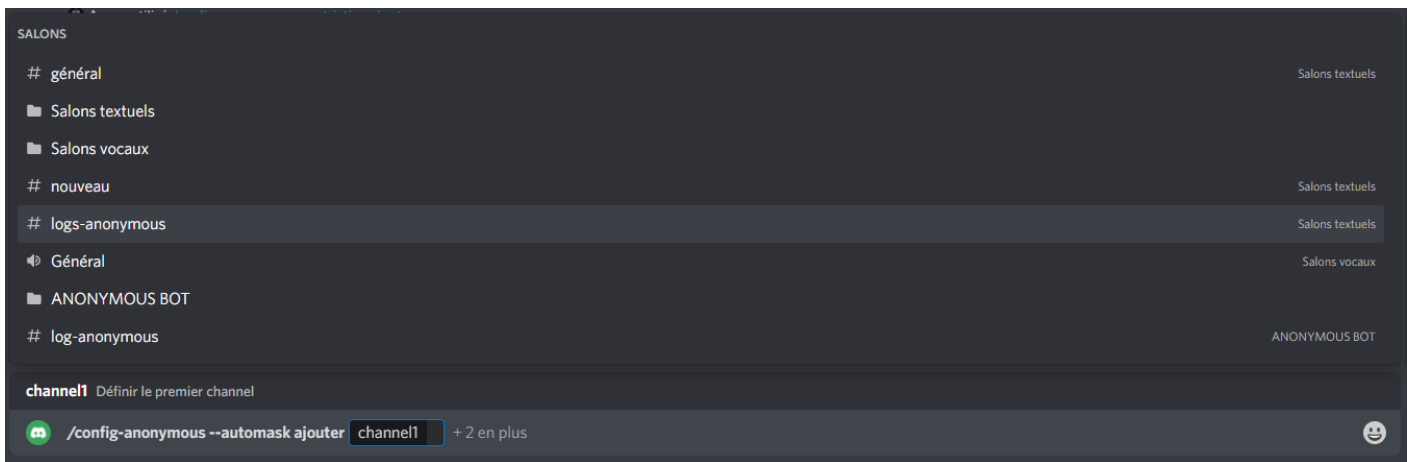

- **Deactivate automation:** `/config-anonymous --automask status activate:no`

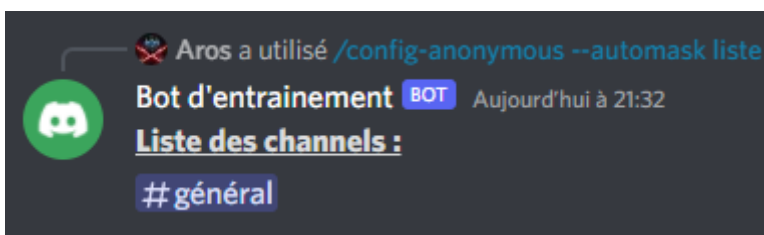

## Channel Management

To define the channels where automation is functional, use the command: `/config-anonymous --automask add`. Automate up to 3 channels in one command.

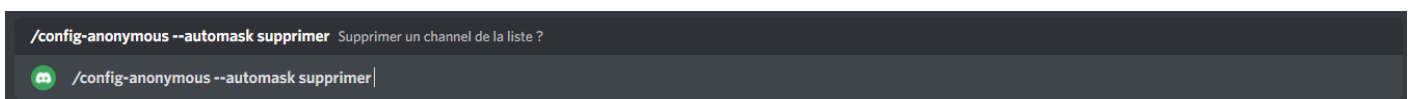

## Display the List of Automated Channels

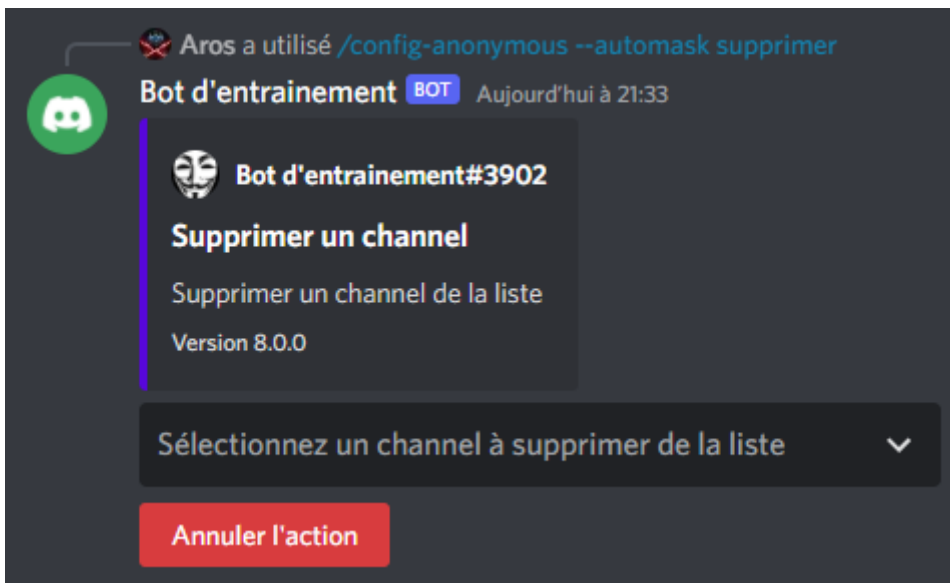

To display the list of channels where the mask command is automated, use the command: `/config-anonymous --automask list`

## Remove Channel Automation

To remove channels from the automation list, use the command: `/config-anonymous --automask remove`

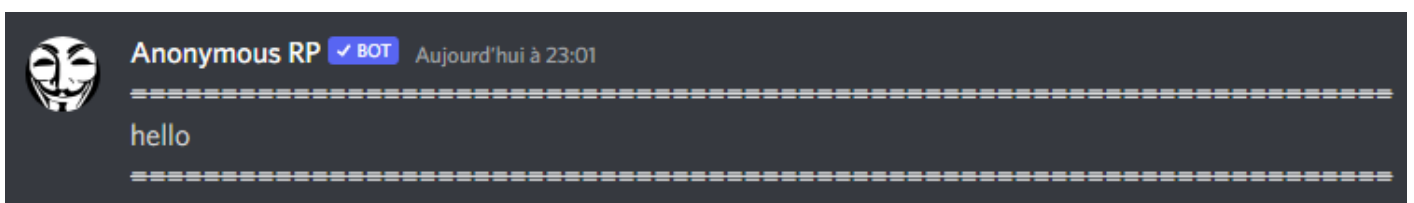

# Add Elements Before and After a Masked Message

You have the option to define if you want to add elements before and after the messages sent with the mask command.

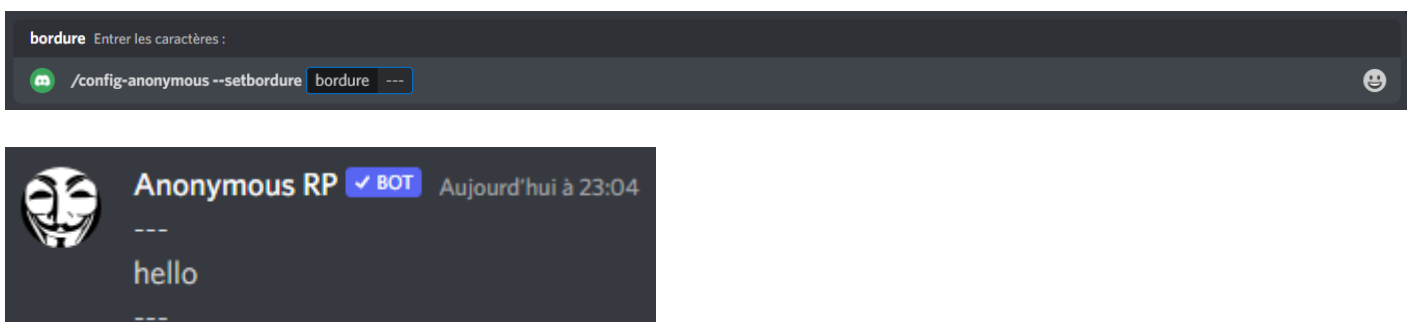

To define the characters before and after the masked message, use the command: `/config-anonymous --setframe`

Command: `/config-anonymous --setframe frame:text` (with text as the content that appears before and after, do not select the text attribute to not add a frame)

**Before:**

**After:**

PARAMÈTRES

bordure

Entrer les caractères :

**/config-anonymous --setbordure** Définir les caractères présents avant et après un message masqué !

 /config-anonymous --setbordure | +1 option
