Installation

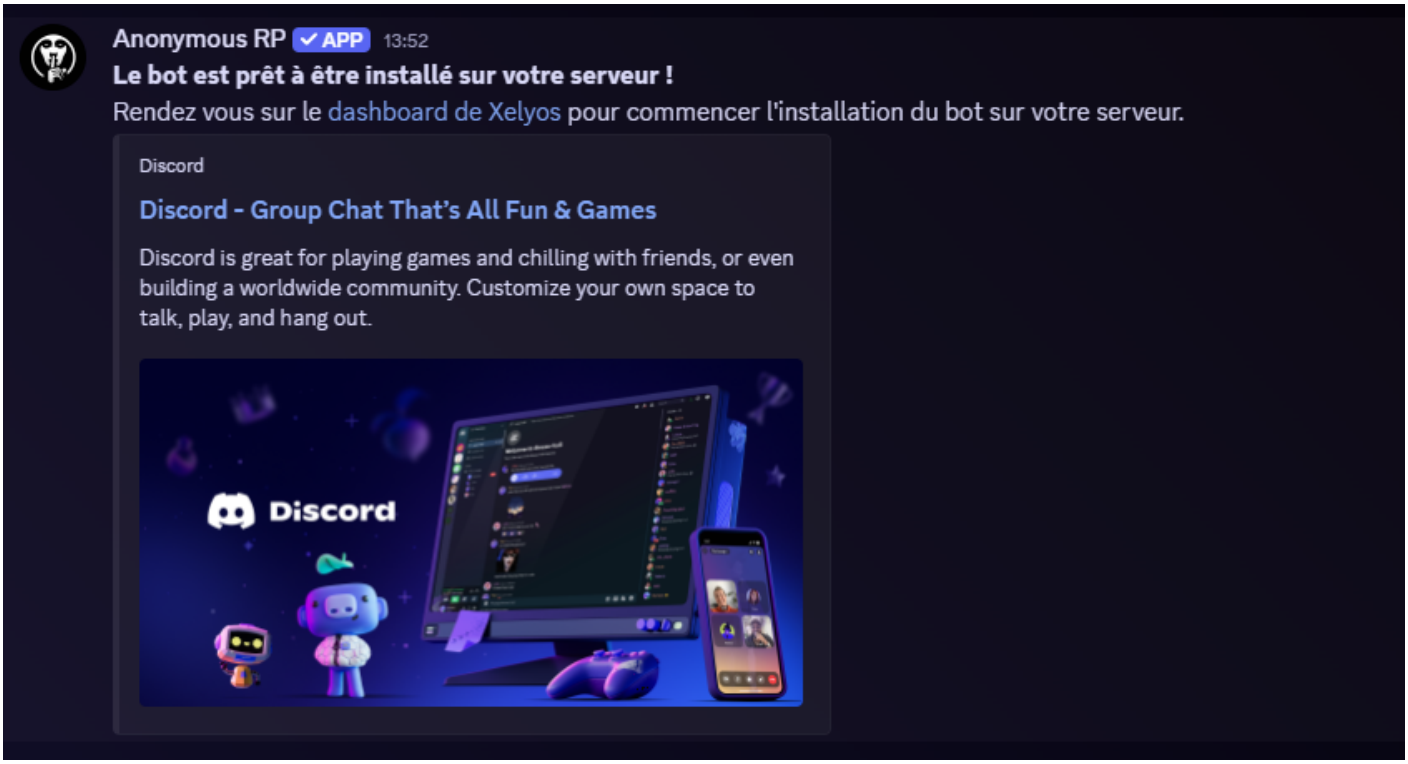

To stay up to date on upcoming bot improvements, join our Discord and get the **Anonymous** role.

Step 1 — Invite the bot to your server

Click the following link to invite the bot: **Invit the bot**

> You must be an administrator of the target server to perform this action.

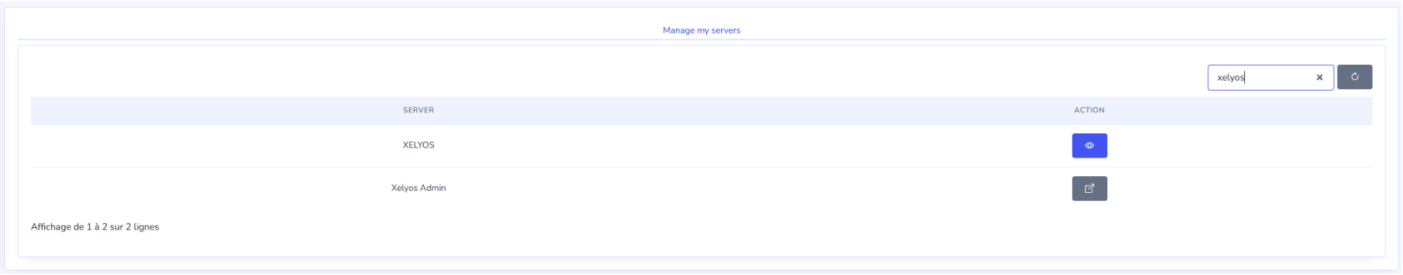

Once the invitation is confirmed, you will receive a **private message** from the bot.

Step 2 — Initialize the bot

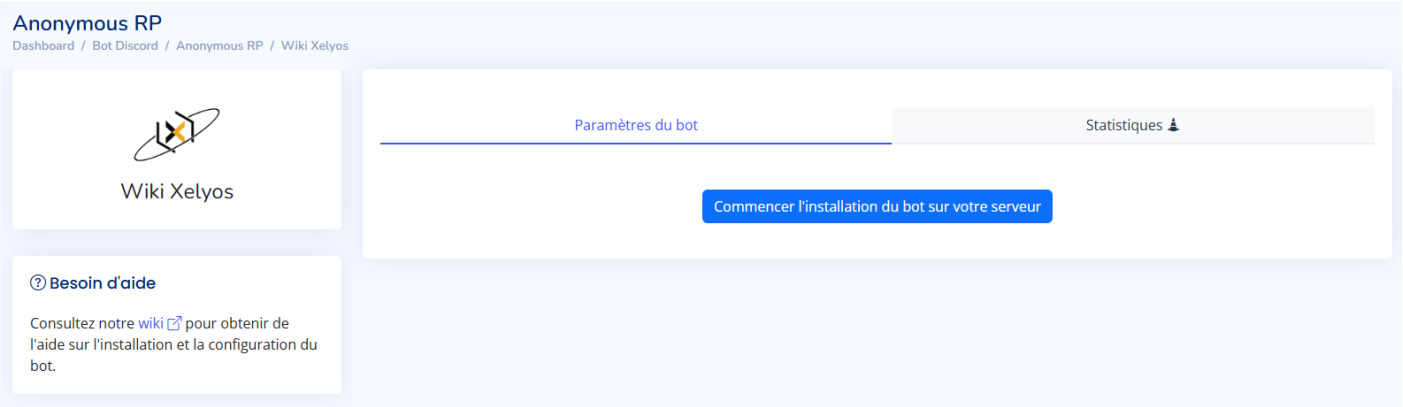

Go to the **Xelyos Dashboard**, under **Discord Bot › Anonymous RP**.

The page displays the list of servers you own where the bot is installed.

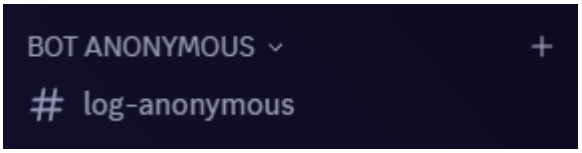

> Can't find your server? Click **Sync my servers**.

Select your server, then click the **Initialize bot** button.

This will automatically create:

> The bot will not work without a valid log channel.
