Channel Groups

Channel groups allow you to group multiple channels together to better organize your content.

Creating a Channel

To add a new channel:

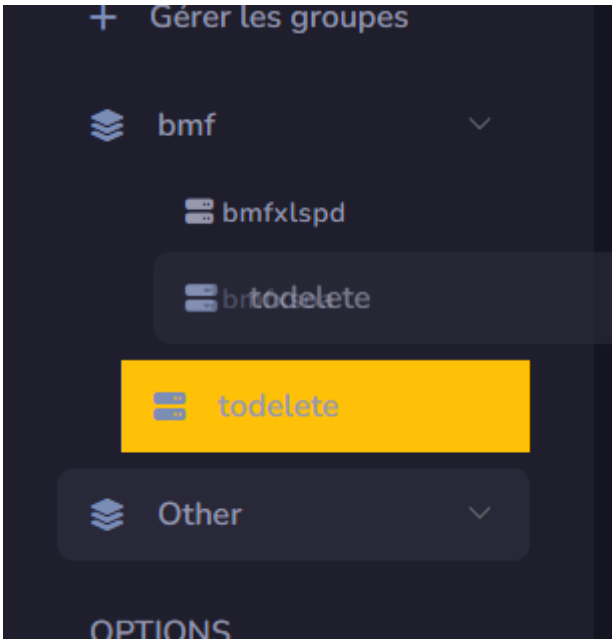

- Click on **"Manage Groups"**.
- In the interface:
  - **On the left**: you'll find the list of existing groups.
  - **On the right**: a form allows you to add a new channel.

Once the channel is created, you can click on it to open and start using it.

Organizing Channels

You can move a channel from one group to another using simple drag and drop.

Deleting a Channel

To delete a channel, go back to "Manage Groups" and use the list on the left to remove it.

> Deleting a channel group will also delete all channels it contains. Please double-check before proceeding.
