- Configure the easytime weather display

Presentation

XelBob-tab is a script designed in collaboration with **Bob's & Co**, aimed at FiveM server owners. The purpose of this script is to display websites directly on your server. You have the possibility to configure multiple websites to be displayed and restrict access based on the player's job, adding a realistic dimension to your server.

Furthermore, **XelBob-tab** offers an optional feature: real-time weather display on the in-game tablet. This feature is accessible only if you use the **easytime** script.

Installation

To download the script, go to: [Xelyos | Bobs&Co | Tablet (tebex.io)]

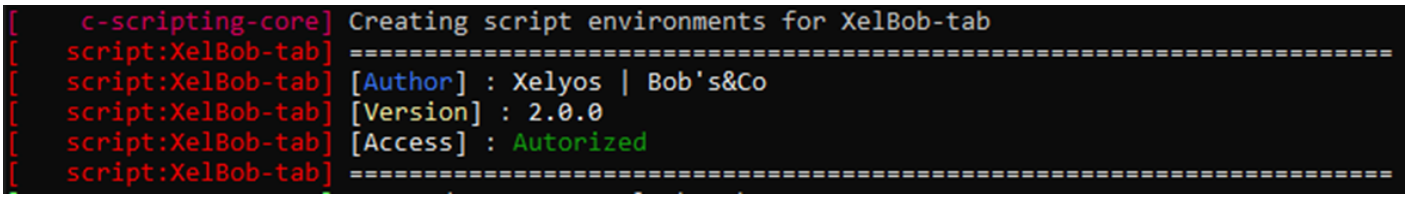

In your `resources` directory, drag and drop the `XelBob-tab` file.

In your `server.cfg` file, activate the resource by adding the line:

```
ensure XelBob-tab
```

> Modifying the resource name will cause the tablet to malfunction

> Once the tablet is correctly installed, when you start your server, this should appear in your console:

Configuration file

ESX Version

```
-- ESX Version
Config.versionESX = 'new' --[[
    'old' (Esx 1.1).
    'new' (Esx 1.2, v1 final, legacy or extendedmode).
]]
```

> Set the ESX version

Set the language for time

```
Config.Locale = 'en' -- en/fr
```

Bind a command for tablet opening

```
Config.Command = 'tablet' -- Set nil to disabled command!
Config.CommandDescription = 'Open tablet'
```

> You can set a command for tablet opening. If you want to disable the command opening, set it to `nil`.

Attach an item to tablet usage

```
Config.Item = 'xelyos_bob_tablet' -- Set nil to disabled item!
```

>

You can attach tablet opening to the usage of an item. To not bind the tablet to an item, set it to `nil`.

Web site configuration

Add a Site

- To add sites, you need to modify the file `nui/assets/config.js`
- Add a line in the `config.sites` array

Line Format:

```
{
  name: "Name displayed on the tablet",
  icon: "img/your_image.png",
  href: "unique_name",
  url: "website_url"
}
```

> Warning, the **href** must be unique and cannot be used on another site!

Example

Before:

```
const config = {
    sites : [
        { name: 'Xelyos', icon: 'img/xelyos.png', href: 'xelyosapp', url:
"https://xelyos.fr" },
        { name: 'Mail RP', icon: 'img/mailrp.png', href: 'mailrpapp', url: "https://mail-
rp.com" },
        { name: 'Top Serveur', icon: 'img/top-serveur.png', href: 'topserveurapp', url:
"https://top-serveurs.net" },
        { name: 'COP app', icon: 'img/lspd.png', href: 'copapp', url: "https://intranet-
lspd.xelyos.fr" },
        { name: 'SECOURS app', icon: 'img/samu.png', href: 'secoursapp', url:
"https://intranet-ems.xelyos.fr" },
    ]
```

```
};
```

New Site:

```
{
  name: "Intranet Xelyos",
  icon: "img/intranet.png",
  href: "intranetxelyos",
  url: "http://intranet-rp.com"
}
```

After:

```
const config = {
    sites : [
        { name: 'Xelyos', icon: 'img/xelyos.png', href: 'xelyosapp', url: "https://xelyos.fr" },
        { name: 'Mail RP', icon: 'img/mailrp.png', href: 'mailrpapp', url: "https://mail-rp.com" },
        { name: 'Top Serveur', icon: 'img/top-serveur.png', href: 'topserveurapp', url: "https://top-serveurs.net" },
        { name: 'COP app', icon: 'img/lspd.png', href: 'copapp', url: "https://intranet-lspd.xelyos.fr" },
        { name: 'SECOURS app', icon: 'img/samu.png', href: 'secoursapp', url: "https://intranet-ems.xelyos.fr" },
        { name: "Intranet Xelyos", icon: "img/intranet.png", href: "intranetxelyos", url: "http://intranet-rp.com" },
    ]
};
```

- The image linked to your site must be located in the `nui/img` directory

Change the Background Color

- You can also change the background color by adding/modifying the `nui/assets/color.css` file

```
.application > #unique_number {
    background: #37517e;
    background: linear-gradient(to right, #37517e, #142747);
}
```

Limit Access to a Site for a Job

To restrict access to a site for a job, you need to modify the file `nui/assets/config.js`.

Restriction Format:

```
{
  job_name: "job_name",
  sites: [
    { name: 'COP app', icon: 'img/lspd.png', href: 'copapp', url: "https://intranet-lspd.xelyos.fr" }
  ]
}
```

> Warning, the line in the **sites** array must be identical to the one in the `config.sites` variable!

Example

Variable with all sites:

```
const config = {
    sites : [
        { name: 'Xelyos', icon: 'img/xelyos.png', href: 'xelyosapp', url: "https://xelyos.fr" },
        { name: 'Mail RP', icon: 'img/mailrp.png', href: 'mailrpapp', url: "https://mail-rp.com" },
        { name: 'Top Serveur', icon: 'img/top-serveur.png', href: 'topserveurapp', url: "https://top-serveurs.net" },
        { name: 'COP app', icon: 'img/lspd.png', href: 'copapp', url: "https://intranet-lspd.xelyos.fr" },
```

```
        { name: 'SECOURS app', icon: 'img/samu.png', href: 'secoursapp', url:
"https://intranet-ems.xelyos.fr" },
        { name: "Intranet Xelyos", icon: "img/intranet.png", href: "intranetxelyos", url:
"http://intranet-rp.com" },
    ]
};
```

Variable with the restriction:

```
const jobSites = [
    {
        job_name: "police",
        sites: [
            { name: 'COP app', icon: 'img/lspd.png', href: 'copapp', url:
"https://intranet-lspd.xelyos.fr" },
            { name: "Intranet Xelyos", icon: "img/intranet.png", href: "intranetxelyos",
url: "http://intranet-rp.com" },
        ]
    },
    {
        job_name: "ambulance",
        sites: [
            { name: 'SECOURS app', icon: 'img/samu.png', href: 'secoursapp', url:
"https://intranet-ems.xelyos.fr" },
            { name: "Intranet Xelyos", icon: "img/intranet.png", href: "intranetxelyos",
url: "http://intranet-rp.com" },
        ]
    }
];
```

With this configuration:

- The site **Intranet Xelyos** will be accessible for the police and ambulance jobs
- The site **COP App** will only be accessible for the police job
- The site **Secours App** will only be accessible for the ambulance job

Configure the easytime weather display

The tablet allows displaying the current weather on its home page.

To use this feature, you need to use the script: **cd_easytime**

Configure the Feature

Enable or Disable Display

```
Config.easytime = true  -- true/false
```

> You can decide whether to use this feature or not. By setting it to **false**, the display will not occur!

Change the Icon

```
Config.weatherIcons = {
    CLOUDS = 'weather-icon fas fa-cloud-sun',
    RAIN = 'weather-icon fas fa-cloud-rain',
    CLEAR = 'weather-icon fas fa-sun',
    OVERCAST = 'weather-icon fas fa-cloud-sun',
    EXTRASUNNY = 'weather-icon fas fa-sun',
    CLEARING = 'weather-icon fas fa-sun',
    NEUTRAL = 'weather-icon fas fa-sun',
    THUNDER = 'weather-icon fas fa-bolt',
    SMOG = 'weather-icon fas fa-smog',
    FOGGY = 'weather-icon fas fa-smog',
    SNOWLIGHT = 'weather-icon fas fa-snowflake',
    SNOW = 'weather-icon fas fa-snowflake',
```

```
    BLIZZARD = 'weather-icon fas fa-snowflake',
    XMAS = 'weather-icon fas fa-snowflake',
    HALLOWEEN = 'weather-icon fas fa-cloud-moon',
}
```

- The icons we use are from **Font Awesome**.
- To replace an icon, change the text after `weather-icon` with the new icon.

> Warning, some icons do not work!

Change the Icon Color

- To change the color of an icon, go to: `nui/assets/color.css`

```
.icon-name, .icon-2-name {
    color:rgb(85, 85, 85);
    text-shadow: 0 0 10px black; /* Add a 2-pixel black outline to the icon */
}
```

Change the GIF in the Background

```
Config.weatherGif = {
    CLOUDS = "background: url('https://i.gifer.com/1427.gif') center/cover;",
    RAIN = "background: url('https://i.gifer.com/73j4.gif') center/cover;",
    CLEAR = "background: url('https://i.gifer.com/Lx0q.gif') center/cover;",
    OVERCAST = "background: url('https://stormandsky.com/gif/11.gif') center/cover;",
    EXTRASUNNY = "background: url('https://stormandsky.com/gif/15.gif') center/cover;",
    CLEARING = "background: url('https://stormandsky.com/gif/11.gif') center/cover;",
    NEUTRAL = "background: url('https://stormandsky.com/gif/11.gif') center/cover;",
    THUNDER = "background: url('https://i.gifer.com/DMI.gif') center/cover;",
    SMOG = "background: url('https://i.gifer.com/7JyC.gif') center/cover;",
    FOGGY = "background: url('https://i.gifer.com/IJNu.gif') center/cover;",
    SNOWLIGHT = "background: url('https://stormandsky.com/gif/11.gif') center/cover;",
    SNOW = "background: url(' https://i.gifer.com/3g5.gif') center/cover;",
    BLIZZARD = "background: url('https://stormandsky.com/gif/11.gif') center/cover;",
    XMAS = "background: url('https://stormandsky.com/gif/11.gif') center/cover;",
    HALLOWEEN = "background: url('https://i.gifer.com/AdL.gif') center/cover;",
```

```
}
```

You can change the GIF in the background according to the weather. To do this, simply replace the URL in `url()`.
