

Installation

To download the script, go to: [Xelyos | Bobs&Co | Tablet \(tebex.io\)](#)

In your `resources` directory, drag and drop the `XelBob-tab` file.

In your `server.cfg` file, activate the resource by adding the line:

```
ensure XelBob-tab
```

Modifying the resource name will cause the tablet to malfunction

Once the tablet is correctly installed, when you start your server, this should appear in your console:

```
