Presentation

XelBob-tab is a script designed in collaboration with **Bob's & Co**, aimed at FiveM server owners. The purpose of this script is to display websites directly on your server. You have the possibility to configure multiple websites to be displayed and restrict access based on the player's job, adding a realistic dimension to your server.

Furthermore, **XelBob-tab** offers an optional feature: real-time weather display on the in-game tablet. This feature is accessible only if you use the **easytime** script.
